The life cycle of the Sun began roughly 4.6 billion years ago and will continue for almost another 8 billion years when it will have depleted its supply of nuclear fuel and collapse into a white dwarf.

Life Cycle of the Sun - Astronomy's Space & Beyond Box : life-cycle-of-the-sun

saque minimo betano

Complete answer: The earth is the third planet from the sun and is located at a distance of 149.59 million km from the sun. In terms of light-years, it can be quantified to 1.58×10^{-5} light-years and it takes 8 minutes and 20 seconds for sunlight to reach earth.

How many light-years away is the sun from the earth? - Vedantu : question-answer
