

# esporte bet365

To convert from a probability to odds, divide the probability by one minus that probability. So if the probability is 10% or 0.10, then the odds are 0.1/0.9 or 1 to 9 or 0.111. To convert from odds to a probability, divide the odds by one plus the odds.

What is the difference between odds and probability? - FAQ 1466

graphpad : support : faq : probability-vs-odds

The odds are defined as the probability that the event will occur divided by the probability that the event will not occur. If the probability of an event occurring is Y, then the probability of the event not occurring is 1-Y.
